All Data is Just One Click Away

CSA's **Cash Receipting/Licensing** system is a fully-featured system designed to allow your office to record your deposits quickly and accurately. The program utilizes CSA's template feature allowing you to store recurring entries which can be recalled quickly at a later date. The flexibility of the module allows the user to define the types of receipts to be entered, # of Cash Drawers and the default accounting entries.

Working with CSA's other modules, the overall cash receipting and collection process is simple, friendly and flexible. You can receipt the payment, update all the affected files, create the license and prepare the necessary bank deposit documents in one easy session. The system has excellent Summary and Detailed balancing reports that can be run for any range of transaction dates.

Cash Receipting/Licensing fits easily into your offices' daily work flow, enhances customer service and provides vital, accurate cash control!
