All Data is Just One Click Away

CSA's **Motor Vehicle Distribution** module was written to alleviate the tedious task of manually distributing and posting motor vehicle monies to the ledgers. The program is 100% state compatible, handling all distributions requirements (levies, percentages, etc.). The software also accommodates loading the fee code totals via diskette or electronic file as provided by the state.

Fee code amounts can be entered as needed (daily, weekly, monthly) then balanced and posted to the General Ledger. There is a variety of recap reports to choose from to assist in the balancing process.

Save time by distributing and posting motor vehicle fees quickly and easily!
