

Vision for the Future!

Tax Assessment

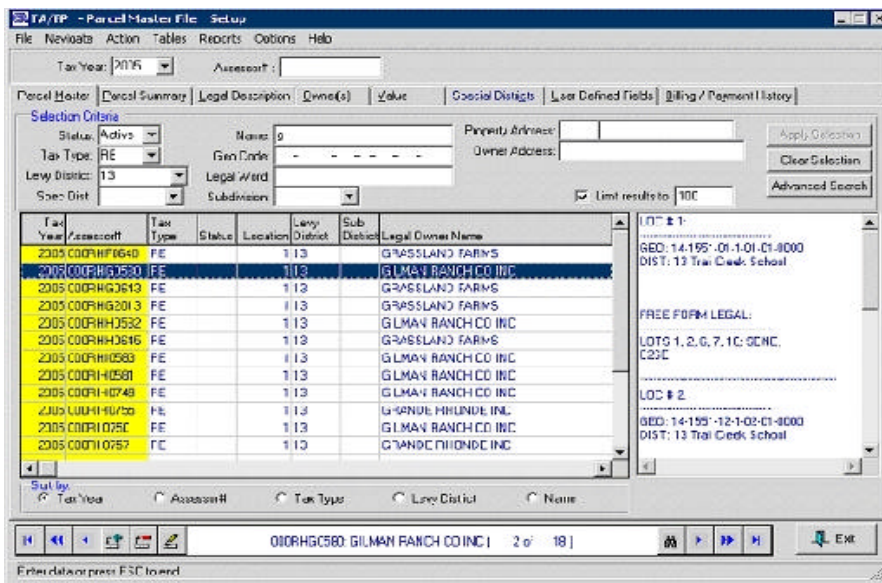

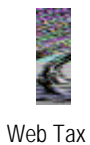

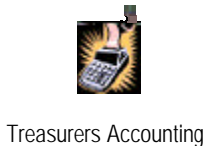

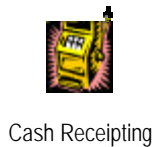

County Business Management Software

Enterprise Edition

CSA's Tax Assessment system tracks property assessments, market values and taxable values across multiple years.

Module Highlights

- Automatic creation of assessment notices.
- User defined valuation types.
- Provides for multiple legal codes description for each assessor number with unlimited free-form legal description.
- Provides for multiple valuations per legal code.
- Generates multiple reports including the County Tax Roll, County Assessment List and Assessment Recap Report by class & class codes.
- Electronic transfer of data directly from the state Dept. of Revenue.
- Powerful Lookup and inquiry features allow for lookup by name, assessor #, tax year, address and more.

CSA's **Tax Assessment** system's powerful reporting capabilities allow for accurate and timely information. It is a logically arranged, easy-to-use system that is flexible enough to accommodate any special tax assessment situation.

Tax Assessment will automatically calculate the proper taxable values based on the State classification codes that are entered into the computer system. The system will then produce reports summarizing information by parcel number, levy district, class code, special improvement district and fund.

The **Tax Assessment** system will save many hours of work in processing and tracking tax assessment information.
