Vehicle Registration Records Found: 4517

All Data is Just One Click Away

The **Vehicle Registration** system tracks multiple vehicle type registrations (i.e. trailers, flatbeds, boats, light vehicles, etc.). This system is designed to allow for both staggered and non-staggered license expiration types, allowing for ease of input for all types of registrations. User defined tables allow for customization for each individual county.

The **Vehicle Registration** system automatically interfaces with CSA's **Vehicle Titles**, **Vehicle Sales Tax** and **On-Line Cash Receipting** modules. Information is entered once, and shared across all four modules. The required state transmittals are standard, and include the ability to electronically transmit this data to the State's FTP site.

Module Highlights

- Designed to meet county requirements
- Table driven and user maintained (without the use of a programmer).
- Automatic sales and county fee calculations.
- Retains unlimited history.
- Built-in inquiries for on-line lookup during data input.
- Posting routines for easy registration modifications and reversals.
- Veteran exemptions.
- Reminder cards.
- Vehicle expiration reports.
- User defined transaction codes.
- Body, make and color are all table driven.
- Law enforcement inquiries.
