Sales Tax Total: \$ 4,984.09

All Data is Just One Click Away

CSA's **Vehicle Sales Tax** module tracks vehicle sales taxes issued within the county. The module interfaces with the Vehicle Registration and Vehicle Titling modules, allowing the county the ability to enter the data in one place, and share it throughout all three modules. It also interfaces with CSA's Cash Receipting module.

The **Sales Tax** module includes all necessary state and county reports, and the automatic civil and delinquent fee calculations. Easy sales tax input with the ability to include the sales tax fee with the vehicle registration fee makes collection very simple for the user and the tax payer.
